

An aerial photograph of a city skyline, likely Portland, Oregon, featuring a river in the foreground with several boats, including a large white ferry. The city is densely packed with buildings, including several tall skyscrapers. The sky is clear and blue, suggesting a bright day. The text "SB 5 – Floodplain Findings for an Urban Level of Flood Protection" is overlaid in large white font across the center of the image.

SB 5 – Floodplain Findings for an Urban Level of Flood Protection

CRC Quarterly Meeting
January 19, 2017

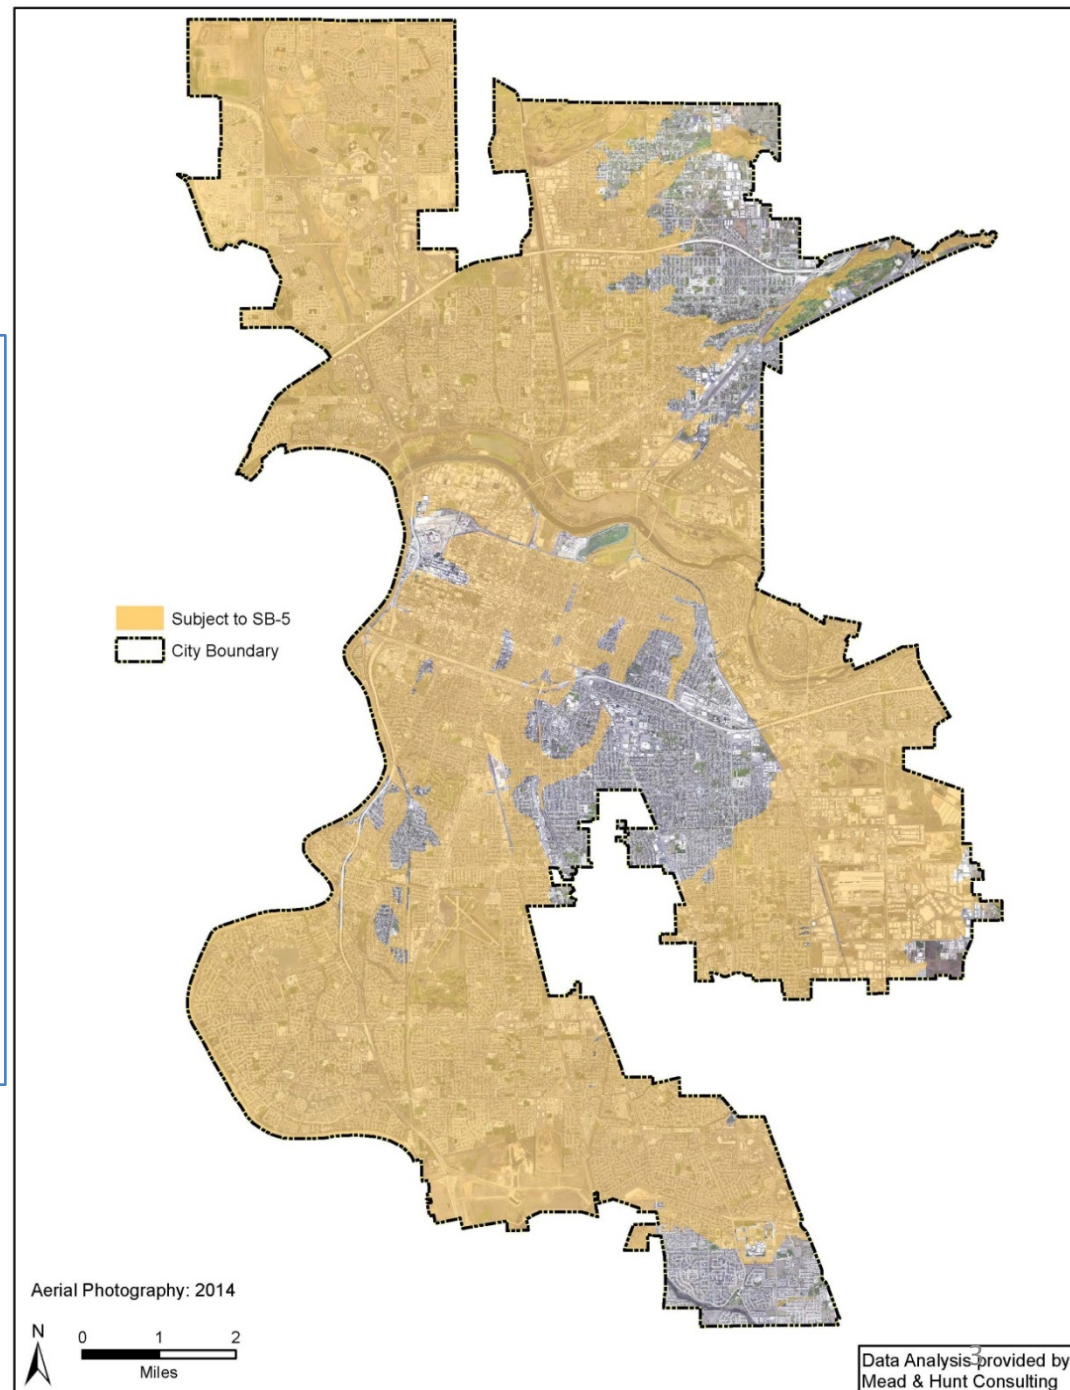

Background

- Senate Bill 5 was approved in 2007
- Applies only to cities and counties in the Sacramento-San Joaquin Valley
- Requires these cities and counties to provide a higher level of flood protection than required by FEMA (200-year vs. 100-year)
- Cities and counties must amend their General Plans and Zoning Codes
- Cities and counties must begin making “SB 5 findings” for certain types of land use decisions.

Riverine Flooding

- SAFCA is preparing an Urban Level of Flood Protection Plan (June 2016). Based on this plan the City will be able to:
- **Find** that the local flood management agency has made *adequate progress* on construction of the flood protection system to provide a 200-year level of flood protection by 2025.

SAFCA PROJECTS

NLIP - Local

NLIP - USACE

North Sacramento Streams
Flood Control Improvements

Folsom Dam Modifications
Project (including Temperature
Control Shutters)

Sacramento River
Levee Improvements

American River
Levees Improvements

Florin Creek Multi-Use Basin

South Sacramento Streams
Group Project

SAFCA PROJECTS

- Folsom Dam Modifications Project
- American River Levee Improvements
- Sacramento River Levee Improvements
- NLIP - Local
- NLIP - USACE
- South Sacramento Streams Group Project
- North Sacramento Streams Flood Control Improvements
- Florin Creek Multi-Use Basin

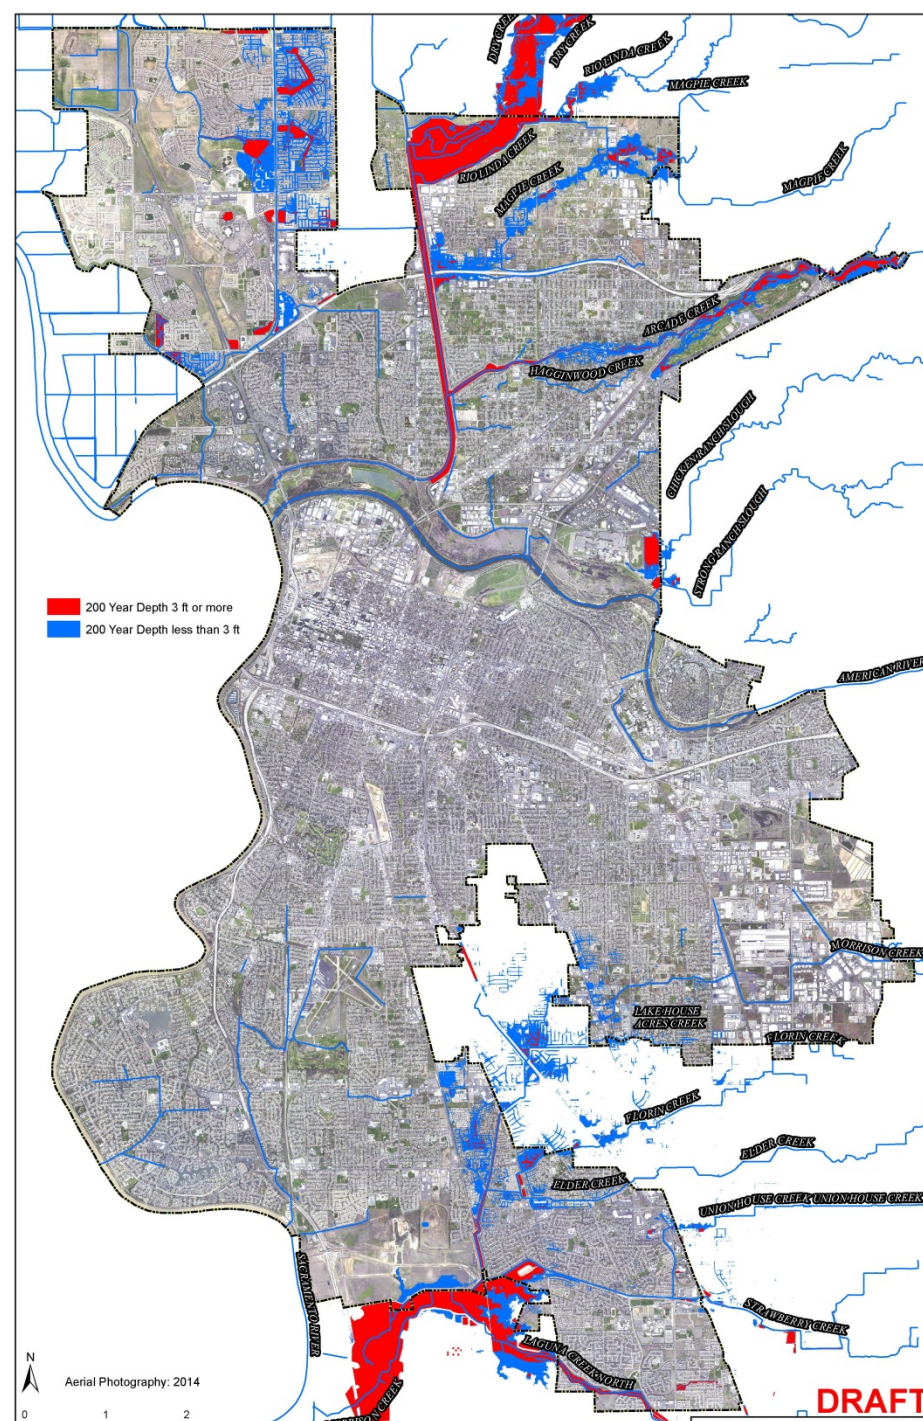

0 1 2 Miles

*Levee Modernization and Sacramento River Bank Protection Project activities are not

Non-Riverine Flooding

-  200 Year Depth 3 ft or more
-  200 Year Depth less than 3 ft

- Find** that conditions have been imposed on development that will provide the required level of flood protection

Thank you!

An aerial photograph of a city skyline, likely Portland, Oregon, featuring a mix of modern glass skyscrapers and older brick buildings. In the foreground, a river flows past a waterfront area with several boats, including a large white multi-decked riverboat and a smaller blue boat. The scene is captured during the day with clear skies and some shadows, suggesting late afternoon or early morning light.
